EVOLUTION PLUS FUND

FUND SHEET • Q1 2020

ABOUT THE FUND

The Quantified Evolution Plus Fund utilizes a strategy that seeks strong absolute risk-adjusted returns on a wide variety of asset classes. Leverage may be utilized to further augment returns. As the fund can invest in assets other than equities, the fund is expected to track equities only in periods of strong equity performance, while allowing investment in other asset classes when equities suffer. It considers four factors to rank and adjust the position size of these instruments to generate a portfolio allocation:

1. Asset momentum (or relative strength)
2. Asset volatility (or risk)
3. Correlation with other assets in the portfolio
4. The likelihood that the asset's positive trend will continue

HOW IT WORKS

• Ranks positions by asset momentum (or relative strength). Adjusts position size according to asset volatility (or risk), asset correlation, and the likelihood that the asset's positive trend will continue.

• Seeks risk-managed growth by using leveraged index funds and future funds to maintain a leveraged position in all of the assets utilized other than short term, fixed income investments which may be invested in solely or in part for the Fund during periods of financial uncertainty or distress..

• The strategy trades often, seeking to be more responsive to market changes.

ADVISORS PREFERRED

An investor should carefully consider the investment objectives, risks, charges and expenses of the Quantified Funds before investing. This and other information can be found in the Funds' prospectus and summary prospectus, which can obtained by calling 1-855-650-7453. The prospectus should be read carefully prior to investing in the Quantified Funds.

High portfolio turnover may result in higher transaction costs and higher taxes when fund shares are held in a taxable (non-qualified) account. Such costs are not reflected in annual fund operating expenses and may affect the Fund's performance.

There is no guarantee the fund will achieve its investment objective. There is no guarantee that any investment strategy will generate a profit or prevent a loss.

An investment in the Fund entails risk, including loss of principal.

Risks specific to investing in the Quantified Evolution Plus Fund include: Subadviser's Investment Strategy Risk, Active and Frequent Trading Risk, Aggressive Investment Techniques Risk, Commodity Risks, Counterparty Risk, Credit Risk, Depositary Receipt Risk, Derivatives Risk, Equity Securities Risk, Foreign Securities Risk, Gold Risk, Interest Rate Risk, Leverage Risk, Lower-Quality Debt Securities Risk, No History of Operations Risk, Non-Diversification Risk, Risks of Investing in Other Investment Companies (ETFs and mutual funds), Small- and Mid-Capitalization Companies Risk.
